42 European CME credits
Welcome to Lille and to the second Advanced Endovascular Aortic Workshop! During these two coming weeks you will learn ‘what to do and how to do it’ through daily live case demonstrations, hands-on workshops (including bench endograft and percutaneous closure system deployment), and training in 3D workstation use and advanced imaging applications. The faculties are experts in this field and will provide the latest guidance on patient selection, endograft planning and implantation tips and tricks. The promising results that can be achieved with EVAR, TEVAR, and branched and fenestrated endografting will be shown. The exam to obtain your official Lille University French diploma will take place on Friday May 27. On May 21 and 22 do not miss the the Critical Issues in Aortic Endografting symposium which will be held at the Barrière Hotel in Lille, your registration is included!
I hope you will enjoy your stay with us.
