CONTENTS

Contributors	11
Foreword	17
Introduction	19
Part one : Aortic Aneurysms :	
from past to future	21
1. Arterial aneurysms. A short historical review.	
R. SUY	23
2. Thirteen steps in thirty years lead to a 21 st century understanding of the abdominal aortic aneurysm.	
D. TILSON	49
3. Extracellular matrix proteins in normal and aneurysmal aorta.	
B. NUSGENS, C.M. LAPIERE, A. COURTOIS	67
4. Imaging in aortic aneurysms.	
A. NCHIMI	85
5. Subject-specific analysis of biomechanical forces in aortic aneurysms.	
Y. XU, J.H. LEUNG, A. BORGHI, Z. CHENG, N.B. WOOD	101
6. How does one study genetic risk factors in a complex disease such as aneurysms?	
G. TROMP	115
Part two : Thoracic Aortic Aneurysms :	
genetics, pathophysiology and clinical studies	145
7. Discovery of genes in thoracic aortic aneurysms.	
P. COUCKE	147
8. New concepts in human abdominal aortic aneurysm patho-physiology : comparison with ascending aortic and other locations.	
J.B. MICHEL, Z. TOUAT, X. HOUARD, L. DE FIGUEIREDOS BORGES, V. FONTAINE, G. JONDEAU	165
9. Thoracic aortic aneurysm : Reading the enemy's playbook.	
J. ELEFTERIADES	187
10. From dynamic anatomy to aortic annuloplasty : the tale of the ring.	
E. LANSAC, I. DI CENTA	199

11.	The aortic homograft for replacment of the aortic valve and critical appraisal of implantation techniques. T. ATHANASIOU, A. ALI, J. PEPPER	235
12.	Cerebral protection during thoracic aortic surgery : the evolution of a concept. M. JACOBS, G. MOMMERTZ, S. LANGER, TA. KOEPPPEL, GWH. SCHURINK, WH. MESS	255
13.	Diagnosis and management of patients with aortic dissection type B : <i>to stent or not to stent ?</i> C. NIENABER	269
14.	Prevention of postoperative paraplegia during thoracoabdominal aortic surgery : current techniques and results. H. MYHRE, R. HAAVERSTAD	283
Part three : Abdominal Aortic Aneurysms : genetics, pathophysiology and clinical studies.		297
15.	Abdominal aortic aneurysms are deep, deadly and genetic. H. KUIVANIEMI, A.M. BODDY, J.H. LILLVIS, J. NISCHAN, G.M. LENK, G. TROMP	299
16.	Aneurysm or occlusive disease-factors determining the course of atherosclerosis of the distal aorta. BT. BAXTER	325
17.	Role of the inflammatory cells during the development of aortic aneurysms. RW. THOMPSON, J.A. CURCI, T.L. ENNIS, D. MAO, M. B. PAGANO, C.T.N. PHAM	335
18.	The role of the intraluminal thrombus in abdominal aortic aneurysms. J. SWEDENBORG	343
19.	The natural history of unrepaired abdominal aortic aneurysm. F. LEDERLE	347
20.	Benefits of screening for abdominal aortic aneurysms concerning ruptures, operations and mortality – a metaanalysis. J. LINDHOLT, P.E. NORMAN	357
21.	Abdominal aortic aneurysm : from phenotype to genotype. J. POWELL	369
22.	Serological biomarkers of progression and rupture of abdominal aortic aneurysms S. URBONAVICIUS, G. URBONAVICIENE, J. LINDHOLT	379
23.	Functional imaging of Abdominal Aortic Aneurysms. N. SAKALIHASAN, R. HUSTINX, P. GOMEZ, R. LIMET	395
24.	Endovascular treatment of aortic aneurysms : A Scandinavian point of view. L. LONN, T. RESCH, J. LINDHOLT	407

Part four : New treatment options for Aortic Aneurysms	431
25. Medical treatment of the Marfan syndrome. G. JONDEAU, D. DETAINT, F. ARNOULT, G. DELORME, M. GAUTHIER .	433
26. Development of pharmacological therapy for abdominal aortic aneurysms based on animal studies. K. YOSHIMURA, H. AOKI, Y. IKEDA, A. FURUTANI, K. HAMANO, M. MATSUZAKI	453
27. Cell therapy for aortic aneurysms. Rational and current development. E. ALLAIRE, F. SCHNEIDER, J. DAI, S. MICHINEAU, A. FIFRE, P. DESGRANGES, J. MARZELLE, N. LOUIS, P. BECQUEMIN, M. GERVAIS-TAUREL	477
28. Could aortic aneurysms be treated medically ? BT. BAXTER, R.L. DALMAN	489
